

SCORE 2013

Student Contest on Software Engineering - Part of ICSE 2013

Program Chairs

Harald Gall, University of Zurich

Mark Grechanik, University of Illinois-Chicago

Organizing Co-Chair

Michael Würsch, University of Zurich

Program Committee

Domenico Bianculli, University of Luxembourg

Yuriy Brun, University of Massachusetts

James Clause, University of Delaware

Ivica Crnkovic, Mälardalen University

Christoph Csallner, University of Texas at Arlington

Elisabetta Di Nitto, Politecnico di Milano

Massimiliano Di Penta, University of Sannio

Thomas Fritz, University of Zurich

Chen Fu, Accenture Technology Labs

Alessandra Gorla, University of Lugano

William G.J. Halfond, University of Southern California

Steven Lauterburg, University of Illinois

Timothy Lethbridge, University of Ottawa

Dino Mandrioli, Politecnico di Milano

Collin Mcmillan, University of Notre Dame

Liliana Pasquale, Irish Software Engineering Research Centre

Denys Poshyvanyk, The College of William and Mary

Ita Richardson, University of Limerick

Romain Robbes, Universidad de Chile

Brian Robinson, ABB

Matteo Rossi, Politecnico di Milano

Raul Santelices, University of Notre Dame

Norbert Seyff, University of Zurich

Eli Tilevich, Virginia Tech

Nikolai Tillmann, Microsoft Research

Michal Young, University of Oregon

Call for Submission to SCORE 2013

Leveraging Open Data

SCORE is a worldwide competition for undergraduate and master's level students. It emphasizes the engineering aspects of software development, not limited to programming. Student teams participating in the contest will devise and implement data-intensive applications that exploit Open Data.

Projects may be developed as part of a software engineering course. Also, they can be composed of students from different institutions. Teams will submit full software products, covering the whole software development process.

Part of ICSE 2013 in San Francisco

The SCORE finals are featured at ICSE 2013, the 35th International Conference on Software Engineering, where the winners will be selected and awards presented. Awards include financial support to help offset travel expenses to ICSE 2013 for representatives of finalist teams.

Key Dates

July 2012 - November 2012: Submission of project abstracts by teams intending to participate in the contest.

December 2012: Submission for summary reports open.

30 January 2013: Submission for summary reports closes.

15 March 2013: Selection of finalists in two stages. Semifinalist teams will be asked to submit a final deliverable, which will be the basis for the selection of the finalists.

31 March 2013: Deadline for the submission of the final deliverable.

30 April 2013: Announcement of the finalists who will be invited to ICSE 2013.

May 18-26 2013 (ICSE 2013): Final evaluation and presentation of the awards.
